FAQ

[Windows 8 Settings Sync](#)

## Delete your personal settings from the cloud

When you sign in to Windows 8 with a Microsoft account, some of your system and app settings are stored in the cloud and synced between PCs running Windows 8.

If you want to stop syncing your settings and remove them from the cloud, there are two things you need to do:

- Turn off synced settings on all the PCs connected to your Microsoft account. (If you use multiple PCs with your Microsoft account, you have to do this on each one.)
- Delete your personal settings from the cloud. (You only have to do this once.)

### To turn off syncing on each PC

1. Swipe in from the right edge of the screen, tap **Settings**, and then tap **More PC settings**. (If you're using a mouse, point to the upper-right corner of the screen, click **Settings**, and then click **More PC settings**.)
2. **Sync your settings**, and then turn off **Sync settings on this PC**.

### To remove your personal settings from the cloud

1. After you've turned off syncing on each of your PCs, return to this page and click **Remove**.
